Wiggy

The Ultimate Custom Lipless Vibration Crankbait.

Designed in Japan by Basser Shizuo Hatori, the Wiggy's unique "Trembling" action imitates "spooked bait fish" when retrieved. It entices non feeding bass into making reaction, or reflex strikes. A hologram sheet is "hot stamped" onto the body, allowing some finishes to reflect the rainbow spectrum in sunlight, adding "flash". The finish is very resistant to peeling, flaking, or chipping.

Tempered trebel hooks are chemically honed. This means strong, razor sharp hooks every time!!

Strategic location of the nose, lip, and pulling eye, keeps the rapid sinking 5/8 oz. Wiggy "tracking true" while being ripped or trolled. The slow sinking 3/8 oz. Wiggy "hovers", and works great in shallow water, or over submerged cover. Refer to the Information section of this website for "Killer Retrieve" tactics.

The Wiggy is my #1 fishing lure. It's versatile, durable, and reliable under all fishing conditions. It satisfies all my wants and needs in a vibration bait. It just simply catches Bass, and I

Never Leave The Dock Without It!
